ACCOUNTING SERVICES

In the current global environment that many entities operate within, there are many challenges for these entities from an accounting perspective as shareholders, regulators and other external stakeholders take a greater interest in how entities report, disclose and communicate their financial results.

With the increased scrutiny on entities financial reporting and disclosure requirements that the standard setters and regulators are requesting from entities, many businesses are often hard pressed to these additional requirements.

Our Accounting advisory specialists can support you in ensuring that entities can meet the additional disclosure requirements from regulators and standard setters and we within the IDS network have experienced professionals to help you to meet these additional demands placed on entities.

IDS provide Accounting Advisory Services (AAS) and have a dedicated team of professionals with in-depth technical accounting knowledge, industry insight and substantial industry experience. Our teams are experienced in advising clients on challenging, complex issues arising from transactions, business decisions and regulatory changes.

It is more important than ever for entities to obtain specialist technical accounting advice and support to help them adapt and succeed. Our teams are committed to helping clients reach the right accounting answer in the context of reporting objectives, commercial reality and regulatory requirements.

Our teams deliver a consistent, cost-effective service, backed by the resources of a network of professionals accountants in managing entire Accounting/ Financing department, managing payroll functions and preparations of financial statements.
